

CJ & Associates, Inc.

FURNITURE PROJECT MANAGER

Dennis Mueller

I hear you.

I understand this industry. I was installing furniture before CJ & Associates, Inc. opened it's doors. I have run deliveries, supervised installers and managed the warehouse. I have coordinated the successful completion of installs involving multiple floors of furniture rolling in on several semis, to small reconfigs involving one or two stations.

I listen first. Then I explain: what to expect and how to plan, so the entire experience runs as smoothly as possible.

I take care of the details. As few or as many necessary to move people, data, power and furniture within our customer's time frame and budget. Even if it means long hours on the weekend to get them up and running by 8am on Monday.

CJ & Associates, Inc., a Nationally Certified WBE, is a full service interior design, office furnishings and remodeling firm. Our certified interior designers can enhance productivity in the workplace through effective space planning, sustainable furniture solutions and finish selections.

We back up our extensive product offering with an unequalled service warranty.
